## Experience

### Software Development Intern

Union Pacific Railroad (May 2018 - August 2018)

Implemented a new interface for viewing shipment details using AngularJS and Spring. Collaborated with team to define and accomplish goals according to business needs. Presented to managers, directors, and VPs.

## Selected Projects

### Ridar

#### iOS App

Aggregates scooter data from Lime, Bird, and JUMP and puts all scooters on one app to avoid switching between apps to find the closest scooter. Developed with 3 other CS students as part of the iOS Programming class.

### GroupMe Bot

#### Node.js Project

Bot that responds to mentions, posts useful information, greets new members, posts memes, etc. Built using GroupMe's API with Node.js, and is deployed on Heroku. Developed with 2 friends for fun.

## Awards

### Eagle Scout
