Graphic Design
Node.js
Python
JavaScript
Java
AWS

Experience

H-E-B (January 2020 - June 2020)
In-Store Shopper (Curbside)
Shopped and delivered orders to customers who ordered online. Promptly resolved issues with orders. Provided friendly customer service on the sales floor.

Union Pacific Railroad (May 2018 - August 2018)
Software Development Intern
Implemented a new interface for viewing shipment data using AngularJS and Spring. Collaborated with team to define and accomplish goals according to business needs. Presented to managers, directors, and VPs.

Projects

Historical Baby Names
Tableau Dashboard
Visualizes historical baby name data from the Social Security Administration. Shows state-by-state change in baby name usage from 1910 - 2017.

Ridar
iOS App
Aggregates scooter data from Lime, Bird, and JUMP and puts all scooters on one app to avoid switching between apps to find the closest scooter. Developed with 3 other CS students as part of the iOS Programming class.

GroupMe Bot
Node.js App
Bot that responds to mentions, posts useful information, greets new members, etc. Built using GroupMe's API with Node.js, and is deployed on Heroku. Developed with 2 friends for fun.
